

Conor

Twin Dispenser

Conor 9700 HSS

The 9700 HSS wrapper is designed to dramatically speed up the wrapping process resulting in the contractor/farmer getting better value for money by saving both time and labour. Because of the positioning of the dispensers at 180° to each other; the bale is perfectly balanced on the turntable allowing the operator to wrap at maximum speed without the risk of pulling the bale, while still ensuring the film is applied evenly across the bale and optimum stretch is achieved.

Conor 9700 HSS advantages:

- Wrapping time is cut in half.
- A Bale can be carried on the load arm while a bale is being wrapped.
- The bale wrapper can carry 6 rolls of film (enough for approximately 180 bales).
- In order to wrap with one roll of film a simple lever adjustment is all that is required.
- It dramatically reduces the costs involved in wrapping as productivity is greatly increased.
- Servo joystick is very user friendly and gives the operator more control over the speed of the wrapper.

Technical Specifications	
Transport Width	2.39m
Transport Length	4.65m
Total Height	2.57m
Height to Rollers	1.17m
Unladen Weight	1755kg
Max. Lift Capacity	1000kg
Turntable Speed (typ.)	30rpm
Min. Hydraulic Flow	22 litres/min
Min. Hydraulic Pressure	160 Bar
Electrical Power	12V DC
Wheel Size	31/15.5 x 15
Road Lights	Standard
